

New Ramset Ramguard™ Drive Pins

Recent changes to industry standards regarding pressure treated lumber have prompted ITW Brands to introduce new Ramset **Ramguard™** pins. The industry standard CCA pressure treated wood is no longer being produced for residential use. Most new pressure treated wood is utilizing the Alkaline Copper Quaternary (ACQ) treatment. ACQ corrodes steel 2 to 4 times faster than CCA treated lumber. **Ramguard™** pins will be coated to resist corrosion in all treated wood, and are the recommended fastening solution for use in all pressure treated wood including the new ACQ type lumber.

Part No.	Description	Pcs Per Box	
09167	2-1/2" Coated Ramguard Drive Pin	100	
09170	3" Coated Ramguard Drive Pin	100	

Look for these new products with their distinctive green package labeling wherever you buy Ramset products.
